RE: Brad Armstrong/APS Networks

To whom it may concern:

This letter shall serve as a written recommendation for Brad Armstrong and his company APS Networks.

As the general manager for the two BILLY ELLIOT tours that began in Chicago IL and in Durham NC in 2011, Brad was hired to be in charge of all of our internet/technical needs for the company and stage management. He set up a system for each department where the computers, printers and fax machines were all wirelessly connected. For the company in Chicago, he also coordinated the other internet needs for all departments backstage. Brad consistently responded to each and every issue that arose for the managers, regardless of the time of day, and we have seamless connection with the tours.

I cannot recommend Brad and his company more highly for his technical abilities and professionally pleasant attitude.

Thank you.

Best regards,

Devin Keudell
